5. `/ArrayOfTermSearchItem/TermSearchItem/TermSourceCode[text()='F31.75']/../ExternalCodes/ExternalCode/Name[text()='OMOP']/../Code[text()]`

6. The differences between the source term "296.55" and the target term likely stem from variations in specificity, granularity, and clinical context. The target term may offer more detailed information or specify a subtype within the broader category represented by the source term, indicating differences in severity levels, anatomical locations, or etiological factors. Additionally, these terms may be used in different clinical contexts or specialties, reflecting variations in terminology standards, diagnostic criteria, treatment approaches, or patient populations. Despite sharing a similar diagnostic code, lexical differences highlight nuanced semantic distinctions that are crucial for accurate healthcare documentation, diagnosis, and treatment.
